

LETTER IDENTIFICATION

GOAL: To identify uppercase and lowercase letters.

Letter identification and recognition is one of the first skills taught in kindergarten. Uppercase (capital) and lowercase letters may be taught separately or in conjunction; it depends upon the classroom and the curriculum. It is important for students to understand that although the two letters may look differently, they have the same sound and meaning. The following letter hunt pages are designed to help students begin to recognize the letters and to also understand the uppercase and lowercase connection.

TIP: Have your student say each letter name out loud as they find and color or stamp it. Talk about how some uppercase and lowercase letters look similar (e.g. Oo), and how some look very different (e.g. Gg).
